Finishing: Powder coated.

optional Remote control

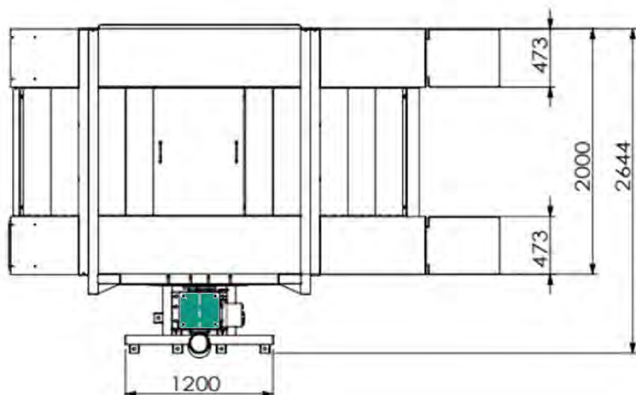

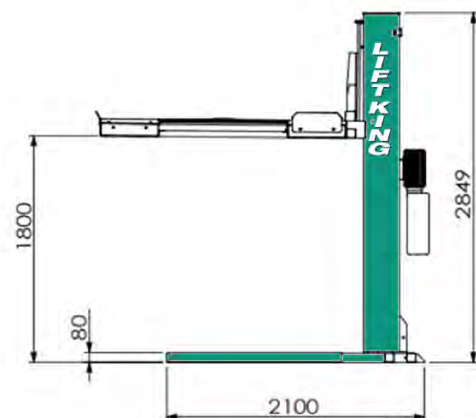

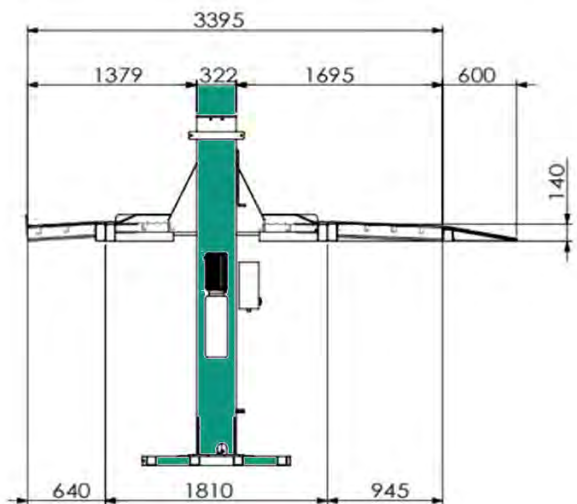

Lift King Single-Post Parking Lift

Features:

1. Hydraulic driven and chain lifting system.
2. Single stage hydraulic cylinder.
3. Automatic lock at different heights & electric Lock release.
4. Compact size and streamlined design without need for maneuvering area.
5. Space saving, free entrance and exit. Suitable for residential use.
6. Usability in corridors, aisles to park the car on platform without blocking the road.
7. Platform will consist of main part welded to carriage with dimension 1790 x 2000 mm and total weight is about 325 kg.
8. Front & back platform parts are exchangeable according to car entry direction.
9. Front part (includes car tires' stoppers, 10 cm high) is shorter than back part according to Center of Gravity calculation.
10. The ramps & runways are made of diamond / checkered steel plates.
11. The middle of platform is corrugated galvanized steel (front & back parts) while is diamond/ checkered steel in main part with lifting handles.
12. All middle parts either corrugated galvanized or diamond/ checkered steel plates are movable.
13. Base plate height is 80 mm with integrated ramps from both sides.
14. Platform main part has guide strip at its edge to avoid misallocation of car during parking on it.
15. All steel parts – if powder coated - are sandblasted then anti-corrosion primer painted and top finish color coated.
16. Post material with thickness of 6 mm to give more stiffness and stability.

Lift King 1-Post Parking Hoist

2000kgs Capacity

15 locking heights / 10cm increments

*** Motor positioned on side of post - to reduce overall installed width...**

***Special colours can be ordered...**
