

Lift King Electro-Release Side-By-Side Parker

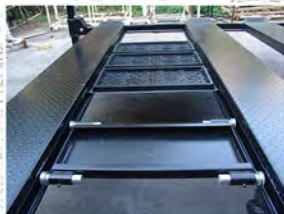

Slide rail

Electro-magnetic safety lock release

15 positive locking positions are cut into the structural steel tubing legs. The engagement area is much larger than with the small welded on tabs

Standard jack tray x 2pcs and drip tray x 6pcs

High quality lifting cable and long life cylinder

Top travel limit switch

Lightweight removable alu. ramp

Lower limit switch

Non-skid diamond plated runways

Easy operation panel and long life hydraulic power unit

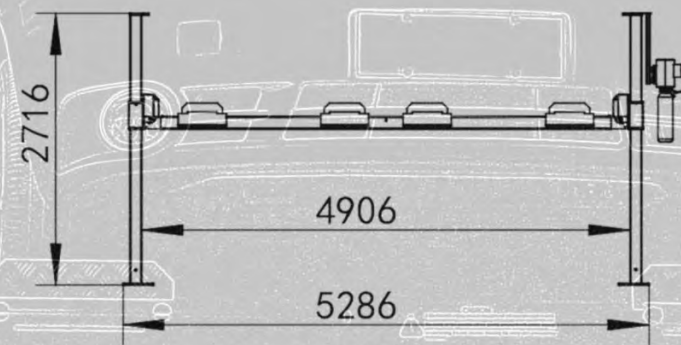

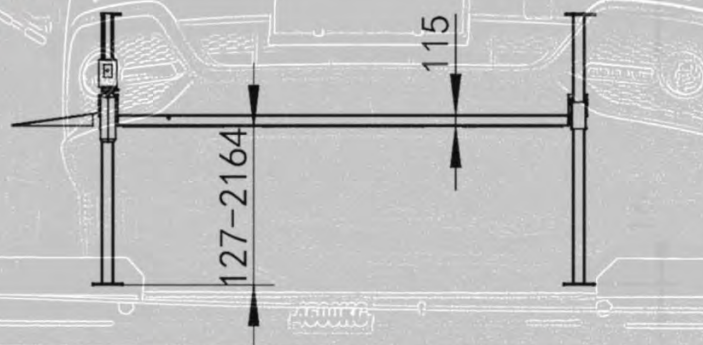

Exclusive wrap-around crossbar design. Box steel leg surrounded by an exterior steel sleeve ensures positive contact

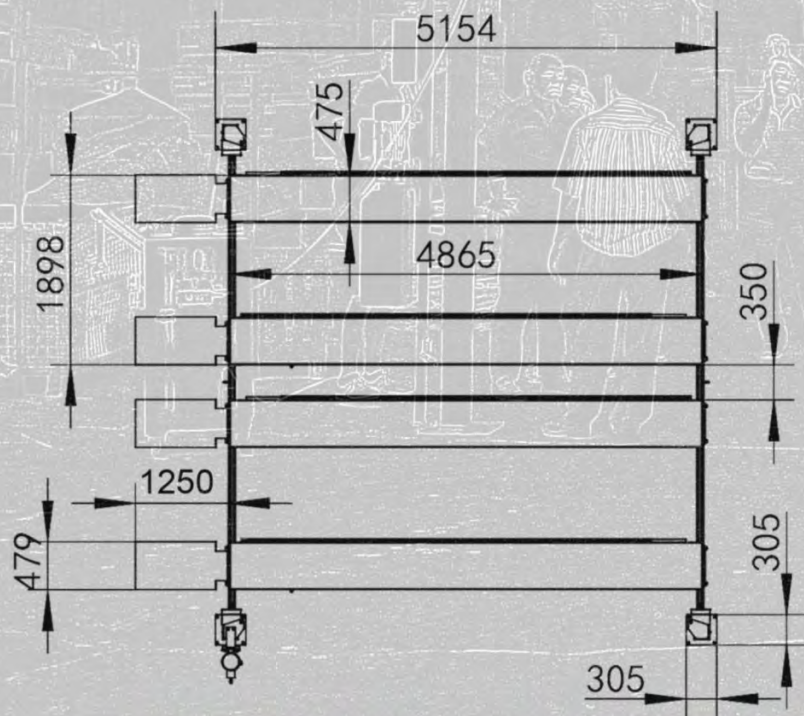

No lateral movement (sway) because of the large sliders (x4) inside each corner of the sleeve riding on each post

DOUBLE YOUR STORAGE SPACE

The Lift is ideal for longer wheelbase vehicles, or for larger 4WD vehicles.
It's wider between the posts than our standard-sized models, and can park taller vehicles underneath the runways... Use it as a service, and/or storage hoist.

Specifications

Capacity	4500 kg
Power	as required
Min. Lifting Height	127 mm
Max. Lifting Height	2279 mm
Overall Length w/o Ramps	5154 mm
Overall Width w/o power unit	5286 mm
Approach Ramp Length	1250 mm
Runway Width	475 mm
Runway Length	4865 mm
Runway Height	115 mm
Height of Columns	2716 mm
Clearance between Columns	4906 mm
Clearance under Runway	2164 mm
Lock Position	15
Shipping Weight	1789 kg
Packing Size	5200x540x1580 mm
